[www.fuellstand.org](http://www.fuellstand.org)

Established: 2004 by Mrs.Dagmar Hoeckner-  
Schallmeiner/ Managing Director

Today: owned by some privat Shareholders incl.

Mrs. Dagmar Hoeckner-Schallmeiner

Sales Representations in more than 20 countries  
worldwide

## SECU-TECH GmbH / Corporate Information

### Business Objectives:

- **Providing Safety- and Environmental Protection Solutions**
- **Providing Solutions for efficient and practicable use**
  - **to avoid overspills and crossfills**
  - **to avoid explosion risks and theft**
  - **to reduce working time and operating expenses**
  - **to reduce risks and costs for our customers**

### Strategy:

Our goal is to offer **flexible solutions for safe and efficient fuel distribution to our customers in the mineraloil-, petrochemical- and chemical industry**

## Fill- and Overfill Prevention Systems and Remote Control Systems – Dead-Man-Systems - radio-controlled and cable-controlled – LRC (Level Remote Control)

- Radio controlled, fail-safe systems, for safe loading/unloading

- of tanker-trucks
- tanks
- ship-bunkering
- ship-loading
- train-refuelling
- airport applications

- all kind of products, ATEX-approved systems

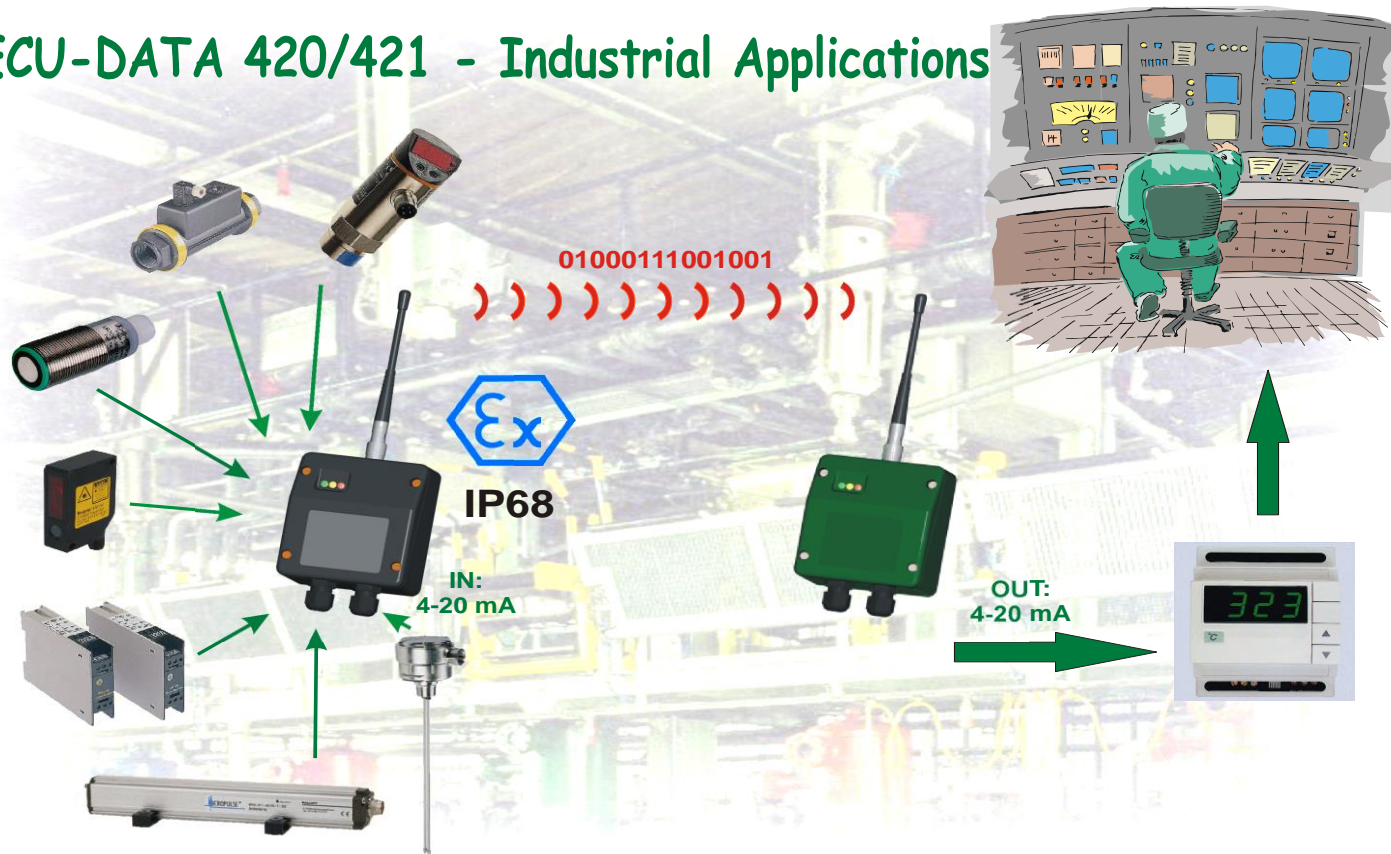

- mobile and stationary use

- Different industries: Heating Oil, LPG, Petrol, Chemicals,
- Different markets: for example: Optical System for Switzerland

## Wireless data Transfer in Ex and non Ex Areas SECU-DATA

Fail-safe wireless data transfer systems for wide ranges (1,5 km) and highest safety and security. Used for data-transfer from ATG systems, also in a lot of other different applications on tanker-trucks, depots, ships, refineries, a.s.o., for long distances with modem.

### SECU-DATA 420/421 - Industrial Applications

## Systems for Safety during Ship Loading / Ship Unloading / Bunkering – wireless Overfill Prevention according to ADN Regulation

- Wireless safety equipment for
  - loading and unloading of gases and flammable liquids from and to ships

## Achievements – working for customers benefits

### LRC Overfill Prevention Systems

Over 7000 tanker-trucks equipped with LRC Systems  
worldwide

- preventing overfills
- making working processes quicker, easier and safer
- saving time and money
- protecting the environment

# Secu MultiTank

Cross Over Prevention - Overfill Prevention  
Sealed Parcel Delivery (Theft Control)

## Comprehensive solution for safe and efficient fuel distribution

Tank Truck

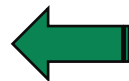

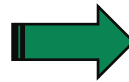

Depot/Loading Arms

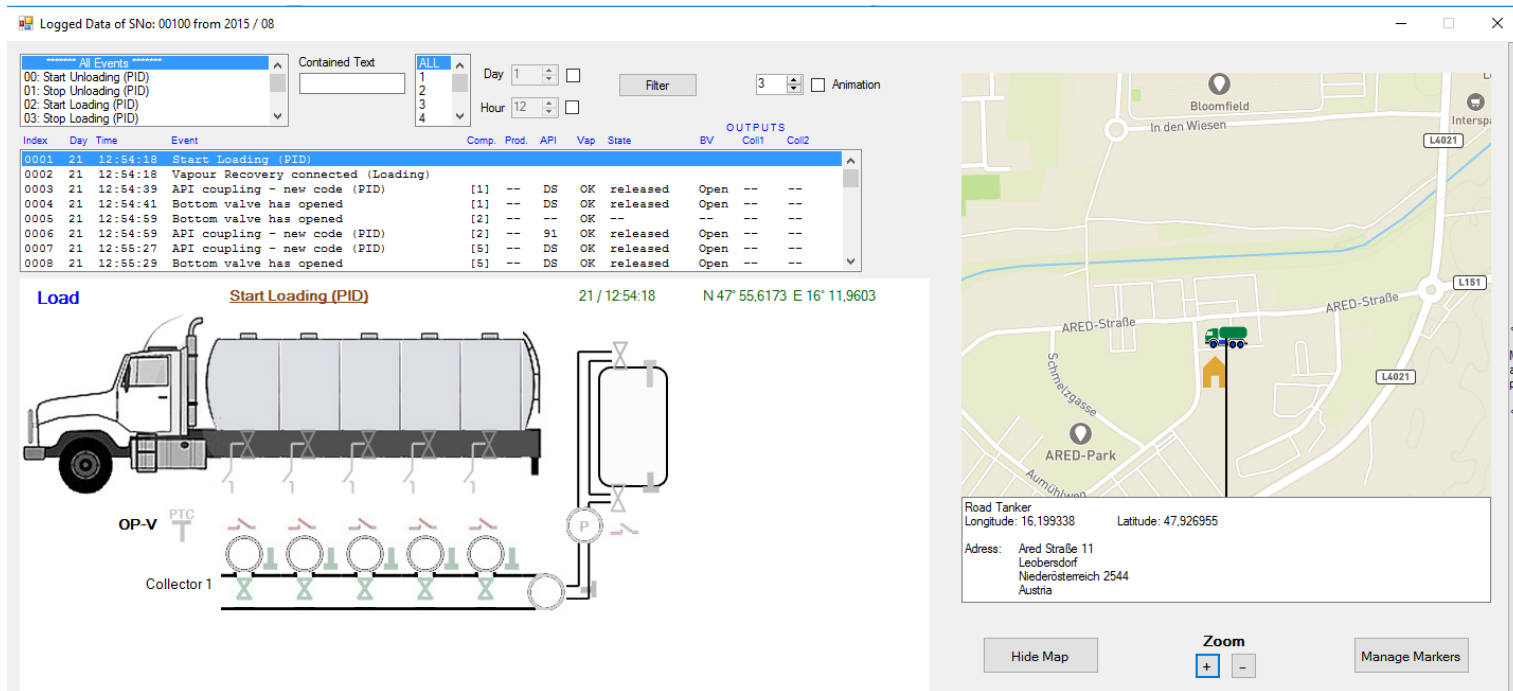

Petrol Station

Tank Truck

## Sealed Parcel Delivery – Tracking/Mapping/ Geo-Fencing – Alarm Mailing

## Achievements – working for customers benefits

### SECU MultiTank Systems

- over 5000 fuel stations
- over 1000 tanker-trucks
- over 500 loading arms

equipped with SECU MultiTank systems Europeanwide.

- preventing overfills
- preventing cross-fills
- preventing thefts
- preventing explosion risks
- making working processes quicker, easier and safer
- saving time and money
- protecting the environment

## Customer specific adaption

Secu-Tech knows the challenges of developing systems for different markets and customers and we are happy to fulfill customer specific requirements flexible and fast.

There are many reasons why it can be necessary to do this:

- Different countries have different requirements and regulations
- Each oil company or haulier has other internal working procedures and company philosophies
- Integration in different IT systems
- Accommodates to different languages
- Different kinds of trucks basic equipment
